FEATHERLITE SWITCHES ON THE GREEN LIGHTS

FEATHERLITE, besides being a leading furniture manufacturer in India, is also a responsible corporate citizen. The company has achieved prestigious certifications e.g., Business and Institutional Furniture Manufacturers Association (BIFMA) Platinum, ISO-9001, ISO-14001 and ISO-18001 based on various safety, health and environmental initiatives. The company has also achieved zero discharge and 100% recycling of its solid waste materials. Featherlite is one of the first manufacturing units in the state of Karnataka to not only sign an MOU with the state government but also to implement and generate 1 MW Solar Rooftop Photovoltaic system (SRTPV) on an industrial building.

The state-of-the-art manufacturing unit at Hejjala, 20 km from Bengaluru, has a rooftop area of 70,000 sq.ft. The company has utilised every available roof space including canteen, two-wheeler stands, car parking roof and canopies besides the main manufacturing unit in order to maximise the power generation. A total number of 3,000 solar panels each generating 320W of power per day, have been imported from Canadian Solar Inc. String inverters (16 Nos) manufactured by Delta Power Solutions Pvt. Ltd., support the power generation and transmission to power-receiving yard. The system has been integrated with state power supply board and surplus power generated is fed into the grid. The system will produce 1.5 million units per annum of which 0.5 million units will be fed into the grid lighting scores of households.

The plant was erected and commissioned by a team of well-trained engineers from M/s.GreenSol Renewable Power Pvt. Ltd., Bengaluru, and Featherlite in a record time of 30 days. This major initiative has reaffirmed the group's commitment to minimising environment degradation by reducing its carbon footprint.
